

A1.1.1 Beelong Eco-Score / Beelong Calculator

Country/Countries: Switzerland

Organization/Host: Beelong

Website: <https://beelong.ch/en/eco-score-beelong/>

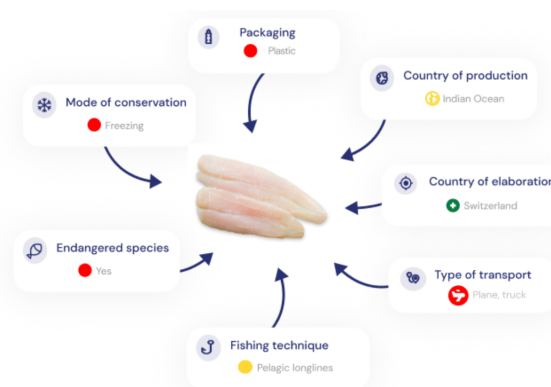

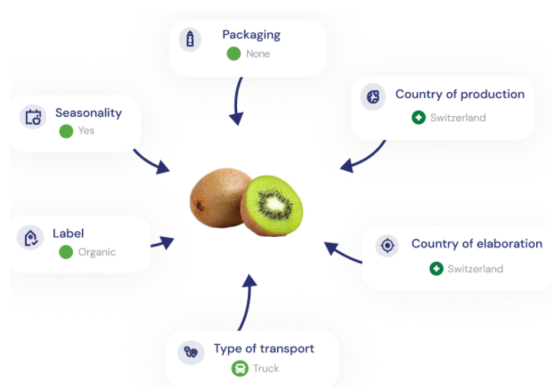

Year of launch: 2008

Development phase: Fully operational tool

Aims and goals: Product evaluation/rating; Menu assessment

Target audience: Food businesses; Restaurants and catering; Customers and consumers

Average monthly users: No data available

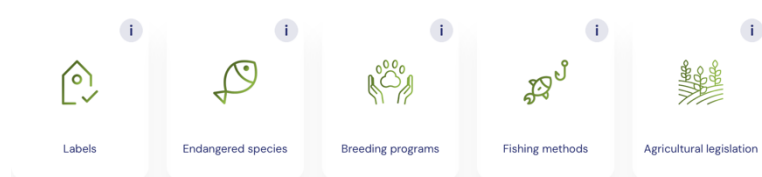

Description:

A Swiss sustainability assessment system that measures the environmental impacts of food products and recipes using life cycle-based methods, including impacts on biodiversity, climate, water use, and production practices. It is primarily a product and menu assessment tool rather than a direct biodiversity monitoring platform.

Key features:

- Life-cycle-based assessment of the environmental impact of food products and recipes.
- Assessment dimensions covering biodiversity, climate, water use and production practices.
- Applicable at both individual product level and full recipe/menu level.

2. Valuing biodiversity & animal welfare

User guidance:

FAQ page in DE/EN/FR that explains how to conduct the calculations: <https://beelong.ch/en/faq/>
