

Cagette.net (France, Belgium, Switzerland)

Organisation: Cagette.net

Geographical scope: France, Belgium and Switzerland

Target users: Producer groups, cooperatives, food hubs and local food initiatives.

Overview

Cagette.net is an online management platform designed specifically for short food supply chains. It enables producer organisations and community-supported agriculture groups to manage online sales, subscriptions and distribution while maintaining strong local governance.

Main functionalities

- Online ordering;
- Basket subscription management;
- Product catalogue;
- Delivery and collection management;
- Customer database;
- Producer administration.

Contribution to biodiversity-based food marketing

The platform enables local producer groups to organise collective sales efficiently while maintaining direct relationships with consumers. It is particularly suitable for initiatives promoting local biodiversity and seasonal production.

Strengths

- Specifically developed for short food supply chains;
- Easy implementation;
- Strong community orientation;
- Affordable solution.

Limitations

Designed mainly for organised producer groups rather than individual businesses.
