

A1.2.5 Seasonal Food Guide

Country/Countries: USA

Organization/Host: Seasonal Food Guide

Website: <https://www.seasonalfoodguide.org/>

Year of launch: 2017

Development phase: Fully operational tool

Aims and goals: Consumer education; Promotion of local and seasonal consumption

Target audience: Customers and consumers; Citizens

Average monthly users: No data available

Description:

A non-profit initiative from the US: an application that shows which fruits, vegetables, legumes, and herbs are seasonally available in a given region, supporting local and seasonal food consumption. It is an educational and consumer decision-support tool rather than a biodiversity monitoring system.

Key features:

- Region-specific display of seasonally available fruits, vegetables, legumes and herbs.
- Support for local and seasonal purchasing decisions.
- Educational rather than measurement-based.

User guidance:

Simple guidance is included on the “About” page:

Use the Seasonal Food Guide to learn when and where your favorite locally grown produce is in peak season and has maximum flavor by selecting a state and the time of year you're interested in. You can also search by produce item — just choose your state and the type of produce you're interested in learning more about. The Seasonal Food Guide includes links to recipes and in-depth information on local, seasonal fruits, vegetables, herbs, legumes and nuts from the [Real Food Encyclopedia](#) Click the Learn & Cook button on the results page to discover more.
